- Location and Language

7. Notices

Uncheck „Email when someone starts following me“, because over 10.000 people are going to follow you from you, so that's a lot of spam.

With this software you can add a lot of followers, very fast.

12. Login Twitter

Log in with you Twitter Account and go to „Tools“ , „Find Targeted Followers“ . Go to „Find suggested users“ , „select all“ and click „Follow“ . Then do this again but stay on the „Find on Twitter“ tab. Search on a keyword like Twitter, website, marketing, woman, ... Click on an account that has between 1000 and 2000 followers. Click on „Followers“ or „Following“ , wait a few seconds and click on „Follow All“ . Now Hummingbird starts following them all, this can take a while. You can follow 2000 people max, this is a limit on Twitter and you can only break it by getting more Followers. Now you've followed 1000-2000 people. Wait 48 hours and let them follow you back. This is how you get followers! Once you have as much followers as people following you, you have to „flush“ the people that you are following, but don't follow you back. So click on „following“ and click the bottom right corner button labeled „Unfollow All“ . But do NOT do a "mass unfollow" of thousands at a time. You are sending a red flag and an increased chance of your account getting suspended.

Repeat from step 12

Keep doing this to get as much followers as u need.

13.

Launch it, add all your Twitter accounts, click „Tweet“ (upper left), select all your Twitter accounts and Tweet something. Now you are Tweeting to all your accounts at the same time!

14. What to do next?

Repeat step 12 every 48 to 72 hours and step 13 every day.
